

under the direct supervision of a full-time salaried veterinarian of the national government of that region and that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in § 327.2 of this title;

(2) The pork or pork products were derived from swine that have not lived in a region designated in §§ 94.9 and 94.10 as affected with CSF;

(3) The pork or pork products have never been commingled with pork or pork products that have been in a region that is designated in §§ 94.9 and 94.10 as affected with CSF;

(4) The pork or pork products have not transited through a region designated in §§ 94.9 and 94.10 as affected with CSF unless moved directly through the region to their destination in a sealed means of conveyance with the seal intact upon arrival at the point of destination; and

(5) If processed, the pork or pork products were processed in a region designated in §§ 94.9 and 94.10 as free of CSF in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinary official of the national government of that region.

[71 FR 31070, June 1, 2006, as amended at 72 FR 30470, June 1, 2007]

§ 94.26 Restrictions on importation of live poultry, poultry meat, and other poultry products from specified regions.

Argentina and the Mexican States of Campeche, Quintana Roo, and Yucatan, which are declared in § 94.6(a)(2) to be free of exotic Newcastle disease (END), supplement their meat supply by the importation of fresh (chilled or frozen) poultry meat from regions designated in § 94.6(a) as regions where END is considered to exist, have a common land border with regions where END is considered to exist, or import live poultry from regions where END is considered to exist under conditions less restrictive than would be acceptable for importation into the United States. Thus, even though the Department has de-

clared such regions to be free of END, live poultry originating in such free regions may be commingled with live poultry originating in an END-affected region and the meat and other animal products produced in such free regions may be commingled with the fresh (chilled or frozen) meat of animals from an END-affected region, resulting in an undue risk of introducing END into the United States. Therefore, live poultry, poultry meat and other poultry products, and ship stores, airplane meals, and baggage containing such meat or animal products originating in the free regions listed in this section may not be imported into the United States unless the following requirements, in addition to all other applicable requirements of part 93 of this chapter and of chapter III of this title, are met:

(a) *Additional certification.* Live poultry, poultry meat, and other poultry products from any region designated in this section must be accompanied by an additional certification by a full-time salaried veterinary officer of the national Government of the exporting region. Upon arrival of the live poultry, poultry meat, or other poultry product in the United States, the certification must be presented to an authorized inspector at the port of arrival.

(b) *Live poultry.* The certification accompanying live poultry must identify the exporting region of the poultry as a region designated in § 94.6 as free of END at the time the poultry were in the region and must state that:

(1) The poultry have not been in contact with poultry or poultry products from any region where END is considered to exist;

(2) The poultry have not lived in a region where END is considered to exist; and

(3) The poultry have not transited through a region where END is considered to exist unless moved directly through the region in a sealed means of conveyance with the seal intact upon arrival at the point of destination.

(c) *Poultry meat or other poultry products.* The certification accompanying poultry meat or other poultry products must state that:

(1) The poultry meat or other poultry products are derived from poultry that meet all requirements of this section and that have been slaughtered in a region designated in §94.6 as free of END at a federally inspected slaughter plant that is under the direct supervision of a full-time salaried veterinarian of the national Government of the exporting region and that is approved to export poultry meat and other poultry products to the United States in accordance with §381.196 of this title;

(2) The poultry meat or other poultry products have not been in contact with poultry meat or other poultry products from any region where END is considered to exist;

(3) The poultry meat or other poultry products have not transited through a region where END is considered to exist unless moved directly through the region in a sealed means of conveyance with the seal intact upon arrival at the point of destination; and

(4) If processed, the poultry meat or other poultry products were processed in a region designated in §94.6 as free of END in a federally inspected processing plant that is under the direct supervision of a full-time salaried veterinarian of the national Government of the exporting region.

§94.27 Importation of whole cuts of boneless beef from Japan.

Notwithstanding any other provisions of this part, whole cuts of boneless beef derived from cattle that were born, raised, and slaughtered in Japan may be imported into the United States under the following conditions:

(a) The beef is prepared in an establishment that is eligible to have its products imported into the United States under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the regulations in 9 CFR 327.2 and the beef meets all other applicable requirements of the Federal Meat Inspection Act and regulations thereunder (9 CFR chapter III), including the requirements for removal of SRMs and the prohibition on the use of air-injection

stunning devices prior to slaughter on cattle from which the beef is derived.

(b) The beef is derived from cattle that were not subjected to a pithing process at slaughter.

(c) An authorized veterinary official of the Government of Japan certifies on an original certificate that the above conditions have been met.
